

TEMPORARY LAUNDRY FACILITIES

Temporary laundry facilities are provided in clear-span tented structures complete with wood floors, lighting, doors, fire extinguishers, and exit signs. All facilities are custom built based on client requirements. Sizes range from 10 washer/dryer units to 75+ units. Gas or electric model units are available. Temporary laundry facilities are provided turnkey and include power, water, and wastewater connections. Fluff and fold service can also be provided.

For smaller requirements temporary laundry facilities can be provided via modular Containerized Laundry Units and can also be combined with the Containerized Gym Unit (CGU).
